

Repairing varicose veins...

At VIVA in Fredericksburg, it's more than for your looks.
It's for your health.

Varicose veins are not only unsightly, they can cause a host of symptoms, from aching and throbbing to cramps and leg swelling. Further, they may be a sign of a more serious problem.

That's why at Virginia Interventional and Vascular Associates (VIVA) in Fredericksburg, we do more than provide cosmetic restoration. We look for underlying problems beneath the surface, providing a thorough assessment before beginning any treatment. Our board-certified interventional radiologists and vascular surgeons are experienced and highly trained in repairing varicose veins. Throughout the region, patients are choosing VIVA as the safest and most effective way to treat varicose vein problems.

Call us today at (540) 654-9118 for a no-obligation consultation.
